PROFILE

Highly motivated Full-Stack Developer with 4 years of experience, including 2 years in a professional setting. I specialize in front-end web and mobile application development, leveraging technologies like Angular, React Native, React, Ionic, Firebase, and Typescript.

I possess a strong foundation in Computer Engineering, fueling my passion for continuous learning and improvement. I actively seek out new technologies and best practices to optimize projects, streamline workflows, and consistently deliver high-performing applications.

My focus revolves around crafting user-centric experiences. I prioritize clean code, performance, and intuitive interfaces to ensure a seamless and positive user journey.

EMPLOYMENT

Frontend Developer Apr 2022 - Jun 2024, **Innova Rhynno, Mexico**
Angular - Ionic - Firebase - Nodejs - Google maps - Mapbox
At Innova Rhyno, I excelled as a full-stack developer with a primary focus on frontend development using Angular and Ionic. I also contributed significantly to backend development utilizing Node.js on the Firebase platform.

My key accomplishments include:

- Driving UI/UX Improvements: Spearheaded the development and implementation of a robust design system based on atomic design principles, resulting in a cohesive and scalable user interface.
- Optimizing Performance: Dramatically enhanced software performance by conducting in-depth code optimizations and database query refinements, achieving up to a 98% reduction in load times.
- Enhancing Development Practices: Proactively introduced and implemented CI/CD pipelines and unit testing frameworks to bolster code quality, increase development efficiency, and ensure reliable project delivery.

Frontend Developer Jul 2022 - Present, **Lagoon Studios, Venezuela**
React - React Native - Firebase - Nodejs - SQL
At Lagoon Studios, my personal venture, I have primarily worked with React and React Native, gaining a

deep understanding of these technologies and successfully applying their concepts to my primary work projects, significantly enhancing the quality of the products I deliver. Additionally, I have undertaken projects that involved the rapid handling of large datasets with Firebase, and I have leveraged Jest as a testing environment to ensure the reliability and quality of the codebase. Through Lagoon Studios, I have honed my skills and brought innovative solutions to the forefront of my professional endeavors.

INTERNSHIPS

Frontend Developer Jun 2024 - Present, **Jauria Team, Chile**
Angular - Rxjs
Active collaboration in the development of "Amipet", a Chilean project for pet information management. My main contributions have been:
- Enhancements to the responsiveness of user interfaces for an optimal experience across different devices.
- Implementation of Atomic Design methodology to optimize the project's structure and scalability.

EDUCATION

Informatics Engineering May 2024 - Present **ESLAEE, Venezuela**
Online Computer Engineering Program (ESLAEE and Washington Christian University).
https://eslaee.com/computacion-e-informatica/

SKILLS

- Angular
- React
- Ionic
- Nodejs
- SQL
- Zutstand
- Axios
- Redux
- Typescript

- Javascript
- RxJS
- GIT
- Github
- API REST
- Agile Methodology
- GraphQL
- Google Maps
- Mapbox

LANGUAGES

Spanish - Native

English - Conversational
